# Easy Store

## Project Description:

A Online retail store is necessary to manage products after collecting from suppliers. It makes easier to both suppliers and consumers to sell and get products form one place. “Easy store” can be a best solution to suppliers to sell products from one place. From this website, managing products and checking product stock reports and product related information’s is easier. Admin, manager and cashiers can handle product management related works. They can inform suppliers if any product is necessary and Consumers can get their necessary products easily from this website. Admin can add and remove managers, cashiers and suppliers info. Manager can add products after checking suppliers info. Cashier can check and add transection related reports of suppliers and supplier can check products, can add them to cart and contact to admin to add product options according to there choice. This project will become a hub for small retailers to sell daily necessary products from one place and will help consumers to get whatever they need. In this project MySQL database is used to save all the information and web programming language PHP, JavaScript and AJAX is used to do the Server side and client side functionalities and HTML and CSS is used to create the frontend.

## Project Folder Structure:

# Easy Store

## Core Modules of the Project:

### AdminLogin.php

```
<?php
include "../Controller/AdminLoginCheck.php";
?>
<?php
setcookie("user_detected", "visited", time() + 86400*7, '/');

if(isset($_COOKIE["user_detected"])) {
echo "<strong>You have visited before.</strong>";

}
}
?>

<html>
<head>

<link rel="stylesheet" type="text/css" href="../CSS/mystyle.css">
<?php echo '<h2 align="center"><u>Login</u></h2>' ?>
<?php echo '<h4 align="center">All Values are Required(*)</h4>'?>
</head>
<body>
<div id="box">
<form action="" method="post" enctype="multipart/form-
data" onsubmit="return myform2()">
<?php echo '<table align="center" width="350" >'?>
<tr>
<td> <label for="aid"><p id="labels" >Admin Id:</p></label>
</td>
<td> <input type="text" id="aid" name="aid" value=
"<?php if(isset($_COOKIE["aid"])) {echo $_COOKIE["aid"];} else echo "";?> "
onkeyup="onclicktext()"><sup><strong>*</strong></sup>
<?php
echo "<strong>".$aiderr."</strong>";
?></td>

</tr>

<tr>
```

# Easy Store

```

        <td> <label for="pass"><p id="labels"
        >Password:</p></label></td>
        <td> <input type="password" id="pass" name="pass" value=
"<?php if(isset($_COOKIE["password"])) {echo $_COOKIE["password"]; }else echo
"";?> " onkeyup="onclicktext()"><sup><strong>*</strong></sup>
        <?php
        echo "<strong>".$passerr."</strong>";
        ?></td>

        </tr>
        <tr>
        <td> </td>
        </tr>
        <tr> <td> </td><td>
